

## 5 Questions

that will help your customer find the right

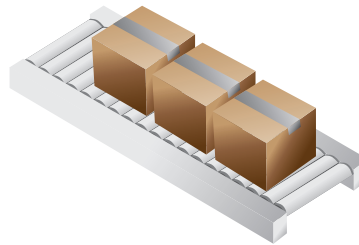

## Carton Sealer

### A Simple Way to Find a Carton Sealer

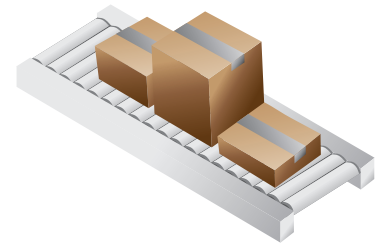

Finding the right carton sealer doesn't have to be difficult. BestPack has come up with 5 Key Questions in order to ensure that your customer gets the correct carton sealer for their specific application. Learn more below.

#### 1) Does the customer need a uniform or random carton sealer?

Is production running one size carton at a time or are they running multiple size cartons on the same line?

**Uniform Carton Sealers**

**Random Carton Sealers**

#### 2) Does the customer need operator fed or operator free?

**Operator Required**

**Operator Free**

Is an operator required to close the flaps and feed the carton into the carton sealer? Or will the carton sealer be fed from a conveying line and need the carton sealer to close the top flaps of the carton?

#### 3) How many cartons per minute, hour, shift and what are the peak periods?

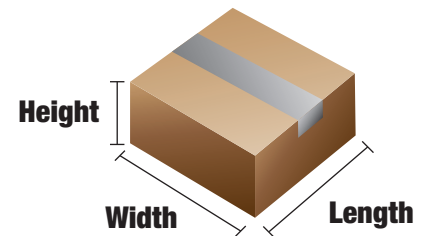

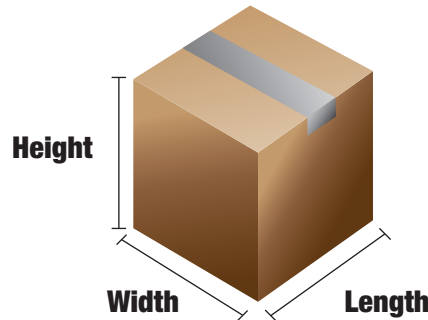

Gathering production data, especially peak times will help you narrow whether a standard speed or high-speed carton sealer is needed.

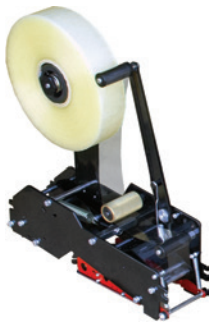

**Time is Money**

## 4) What are the carton sizes?

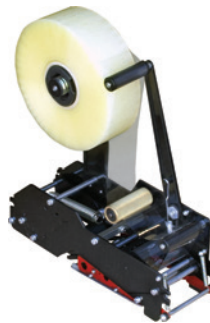

Gathering ALL carton sizes and any future plans can narrow down what carton sealer will be ideal for the long term.

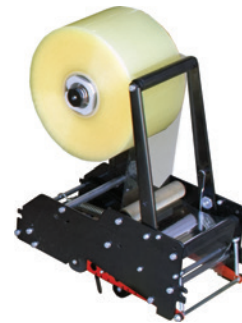

## 5) Does the customer need a 2", 3", or 6" Tape Head?

**2" Tape Head**

**3" Tape Head**

**6" Tape Head**
