

MPBF

Manual Pneumatic Bottom Flap Folder Packing Station

The BestPack™ MPBF is a bottom flap folder and packing station that closes the bottom flaps and holds the carton in position to allow the operator to pack the carton. After packing, the carton is sent to the next station at the push of a button that activates an air ram. The MPBF is a great addition to BestPack's flagship carton sealers and provides a total packing line solution.

All BestPack units are available in our standard baked enamel finish and food grade 304 stainless steel in 21 CFR 110 compliance.
