

Anatomy of a BestPack High Speed Tape Head

Tension Adjustment Knob

A simple single adjustment, that handles both acrylic and hot melt tape.

Optimizing Arm

Used to smooth the tape release from the roll and reduce tape unwind noise.

Brass Roller

Handles Acrylic and Hot Melt Tape with minimal adhesive build-up.

Gentle Overall Geometry with Adjustability

For difficult applications from very soft under filled cartons, to heavy overfilled cartons.

Adjustable Tab Length

Tab Lengths from: 2.5", 2.75", and 3.0"

Tape Erect Plate

Allows for consistent application in adverse windy environments.

Application & Wipe Down Rollers

Designed to handle high speed and standard speed belt drive systems.

Dual Arm Supports

Provides rugged stability for reliable tape application.
