MSBFT
SEMI AUTOMATIC UNIFORM BOTTOM CARTON SEALER

The BestPack™ MSBFT Series is a uniform operator-fed, bottom carton sealer designed to reduce operator time and fatigue when folding & sealing the bottom flaps of a carton. Another advantage of using the MSBFT compared to hand taping, the quality of the seal and the appearance of the carton is greatly improved. This unit many times is used when carton-forming volume has become too large to manually form and tape the cartons completely by hand, but the volume is too small to justify a fully automatic carton erector/sealer.

All BestPack units are available in our standard baked enamel finish and food grade 304 stainless steel for 21 CFR 110 compliance.

ERECTOR PROCESS: The carton erector has two stations. The first station folds the bottom flaps of the carton and the second station seals the bottom flaps and feeds the carton automatically on to a conveyor.
