

RSBFT

RANDOM SIDEDRIVE BOTTOM FLAP FOLDER

The BestPack™ RSBFT Series is a random operator-fed, bottom carton sealer designed to reduce the time required to fold & seal the bottom flaps of a carton. This unit can be used when random size carton forming volume has become too large to manually form and tape the cartons, but the volume is too small to justify a fully automatic carton erector/sealer.

All BestPack units are available in our standard baked enamel finish and food grade 304 stainless steel for 21 CFR 110 compliance.
